Packaging:**Inner:**

Blue tint food grade bag, sealed.

Outer:

Brown food grade box, printed with supplier information. Self adhesive blue tape closure.

Product Coding & Labelling:

The product is coded in the following format:

product name
net weight
best before date
storage t° -18°C
batch code (lotnr.)
Produced in

Storage & Shelf life:

Store at –18°C. or below, ideal storage should be at –20°C. Avoid storage with strongly flavoured materials, or with materials that absorb flavours readily. Shelf Life at these temperatures is 24 months. Minimum 6 months on delivery. Once opened, the remaining material should be returned to cold storage of –18°C (or below) as soon as possible in order to retain product quality.

Frucom Limited Genetically Modified Foods Policy

Frucom Limited does not process any raw materials that have been genetically modified. The company does not take part in trials of modified plant matter and aims not to manufacture mixed products where ingredients or components have been produced by means of genetic modification.

In this instance genetic modification covers not only plant matter that has been significantly altered by genetic manipulation to give a product different from the naturally occurring material, but also finished produce that has been manipulated and in the course of its manufacture no longer contains genetically modified material. Materials that have been produced from genetically modified micro-organisms or plants which may or may not contain genetically modified materials will not be handled by Frucom Limited

The company position regarding the genetic modification of foods will remain as stated. Until such time that sufficient scientific evidence exists to demonstrate the absolute safety of all genetic modification, or until such a point where our customers are willing to accept genetically modified produce on the basis of safety as stated above.

Frucom Limited Nut Handling Policy

Frucom Limited does not handle nuts, nut by-products or nut derivatives. This includes no nut products in the canteen vending machine.

As a consequence of not processing nut products the company does not have an internal nut segregation policy of production lines, equipment or personnel.

Customer Specification	Issue Number: 04	Issue Date: 25/04/20222

Suppliers are audited by means of a self-assessment questionnaire, the response to which will demand either no, limited or further investigation.

Suppliers to Frucom Limited which handle nut or nut products will be audited, to assure us and our customers that there is no possibility for the contamination of produce with nut or nut derivatives.

The following list outlines those species covered by this policy:

- | | | | |
|---------------------|-----------------------|--------------------------------|--------------|
| Almonds | Acorns | Almondettes (Buchanania seeds) | Betel nuts |
| Brazil nuts | Bread nut/Bread fruit | Beech nut | Butter nut |
| Cashew nuts | Chestnut | Cob nut | Chinquapins |
| Chilean wild nuts | Cola nuts | (Bushy chestnut) | Filberts |
| Ground nuts/Peanuts | Ginko nuts | Heart nuts | Hazel nut |
| Hickory nut | Jojoba nut | Jack nut | Lichi nut |
| Monkey nut | Macadamia | Oyster nut | Pecan nut |
| Pili nut | Paradise nut | Pine nut | Pistachio |
| Quadong nut | Shea nut | Squari nut | Sesame seeds |
| Tallow nut | Tropical almond | Tahiti chestnut | Tiger nut |
| Walnut | | | |

The above list may alter as other nuts are found to be allergenic and further legislation occurs. Where there is any doubt from the supplier as to whether their produce contains any of the above listed produce, it shall be considered that such nuts are present and that they may present a risk to the final consumer.

Product Quality Parameter

These are fresh products and, therefore, by their very nature may vary as a result of seasonal influences, such as the time of harvest, the prevailing and historic weather conditions. However, such factors have no reflection on the overall performance of the product. Crops may be treated with pesticides to control insects, and other materials to control yeasts and moulds, with the aim of achieving their total absence from the finished product. All raw materials are tested on an annual basis to ensure that chemical residues do not exceed current legislative MRL guidelines. We ensure that MRL's are not exceeded by only applying chemical treatments on an absolute necessity basis, and always observe legal and manufacturer's instructions in full.

The products supplied by Frucom Limited shall conform to all current EC/UK legislation.

All product is metal detected in accordance with the standards in our HACCP plan. Ref HLL

All details of this specification will remain confidential to Frucom Limited. No other party is empowered to disclose any details to a third party. Any changes to the product will be made with prior notification to the customer as appropriate.
